It is announced from the office of the Wheat Pool that the total acreage signed up by Sept. 15 reached 2,670,543, which is about 213,000 acres short of the required fifty per cent. People in the country are too busy now with other work to bother with poultry shipping. Meanwhile the chickens are having the run of the grain fields and are putting on considerable fat. Quotations last week were 21 and 25 in Calgary.

LOCAL ITEMS

If you have any news item drop us a line or phone us the information.

There are now sufficient men in the district to attend to the stooking and threshing needs of the community. It is a busy season and there is no need for any man to go long without work.

Frank Oliver, Edmonton newspaper man and politician, has been appointed to the board of railway commissioners. That he will fill the position with credit to himself and dominion goes without saying.

Two piles of lumber is all that remains of the rink that was. It was an open affair, and the material has been taken down to make way for the splendid closed rink that is to be. Demolition has been in the hands of Messrs. William and Earl Clark, and they have made a good job of it.

Members of the Good Deeds Women's Institute will entertain members of the Champion, Kirkcaldy and Vulcan institutes, at the Anglican church in Vulcan, on Wednesday afternoon, October 3rd. There will be a program and refreshments. It will be a real institute event, for the Good Deeds members do not do things by halves.

Mr. Isaac Jacobson gets a front page place in the city papers for his record of 60 bushels of number one wheat per acre from 45 acres. This is truly a Vulcan crop, for you can stand on the station steps and see it. In good seasons, and in bad, if anybody gets crops, Mr. Jacobson gets them. He is a big contributor to the farming fame of Vulcan district.

Stately lady golfers, a dozen or more, are expected to be week-end visitors to Vulcan to play local golfers over the local course. It is the return of a visit recently made by the Vulcan ladies to Stately which, by the way was not before reported in this record of events. We have no information as to the games won and lost, but we are assured that the visitors were delightfully entertained when over there.

Next week it is expected that the Dramatic Society will make definite announcement in connection with a picture program that it is proposed to present under their auspices for the benefit of the skating rink, that is for equipment and conveniences for skaters, hockey players and spectators at the rink. It will be a great picture at a fair price, and an opportunity for everybody to help a good thing along. And they'll all do it.

Use no more postage stamps on cheques after September 30. We saw a fellow post a letter, the other day that had on it an excise stamp. Of course that letter would go to its destination all right, but the receiver would be required to pay double postage to get it. This reminds us of the new stamp regulation, which becomes effective at once, details of which are contained in a recent circular sent out by the post office department. It is pointed out in it that the provision of the Special War Revenue Act of 1915, which permitted the use of postage stamps in payment of stamp taxes on cheques, receipts, bank drafts, etc., has been repealed, and that after October 1 only excise stamps may be used for such purposes. Excise stamps will be on sale at the banks and such other places as may be designated by the department of customs and excise, but they the not to be sold by postmasters, for the reason that it would not always be understood that the stamps obtained at the post office could not be used for postage. The result of such a misunderstanding would be that letters or other articles would be put in to mails prepaid by excise stamps, which are not valid for postage and would not be recognized as such by other countries. As a result, a large amount of correspondence, instead of going forward to its destination, would have to be diverted to the dead letter office and returned to the senders for postage, or sent on subject to the collection of double the deficient postage for the addressees. The confusion and annoyance and delays that would thus be caused can only be avoided by confining the sale of stamps in post offices to postage stamps.

LOCAL ITEMS

Mr. and Mrs. A. G. Spooner were Calgary visitors this week.

Vulcan Women's Institute will meet at the home of Mrs. Jennejohn on October 5th. Roll call will be answered with pickle recipes, and samples where possible. There will be a program. Meeting at three o'clock, and all ladies cordially invited.

Mr. W. A. Clark, of Seattle, and formerly of this district, is now assistant manager of the Woolworth stores in Seattle. He comes in a time when it is nice to be here, and is greeted with the good spirit that always possesses our people, and particularly in times like these.

Rev. C. D. Donald of India, will speak in the Union church on Wednesday evening next, October 3rd, under the auspices of the Women's Institute. The address will be illustrated by lantern slides. The annual thank offering of the Women's Missionary Society will be taken at this meeting. Everybody welcome.

Gold medals and silver cups, trophies to be awarded in connection with the annual school fair, have been on display in the jewelry shop window for a week, and certainly they have been much observed. Do you know, folks, that Vulcan gives more in prizes than any school fair in the whole province, and Alberta is a big place.

Mrs. Geddes, who plays the piano with the Ober orchestra, and is active in our community life, has the start of us all in a way. We have permission to say that she has had a dip in the new swimming pool at Nanton. It was great sport, and the pool is a popular place in our neighbor town. Gee, but it must be fine! We'll get one yet.

"Huge yields at Vulcan," is the large display heading on the front page of the Lethbridge Herald, over an article which records some of the big grain yields in the Vulcan district. Mention of these have been made in The Advocate. Vulcan is sure getting the publicity—through big crops, and the community is experiencing the prosperity which comes by the same source.

Mrs. Embree, two years ago a resident here, has decided to return to Vulcan. This is splendid news, for professionally Mrs. Embree is an elocutionist and musician, teaching elocution, singing and piano, and the contribution of her excellent talent to community entertainment has been well remembered. Vulcan will surely welcome her coming. Enquiries as to tuition may be made in the meantime to Mrs. LeBow.

The Alberta division of the Canadian Red Cross Society in its annual appeal for funds and memberships is this year making a special request to the farmers of the province for donations of grain which will be regarded as equivalent to membership fees. This appeal is receiving support from the grain companies of the province and instructions are being issued to all elevator men as to the basis upon which donations will be handled. The wheat pool, through its secretary, endorsed the campaign for wheat and declare that farmers who have signed the wheat pool contract are at liberty to make any donation they may desire to the Red Cross. So give the Red Cross a bushel of wheat and do your bit.

When it rains, threshing crews trek to town. There was a big bunch in on Friday last. Threshing gangs generally are sporty, game and good natured, and what they sometimes lack in fine manners is more than made up by bigness of heart. But in almost every gang there is a disturber or two, and if it were not so everything would go along all right. But the kickers on Friday last seemed to have got the worst of it. One man was brought to town and paid off because it had been discovered that he had put a stone in a bundle, a trick that is not new but none the less despicable, and one calculated to wreck the threshing machine. This formed the subject of a general discussion, and it soon developed that a certain organization that has no favor outside of its membership was represented to some extent, and after a few little jangles the climax came when one boasted loudly of his affiliations. No sooner had he said it than down he goes with a wallop on the nose. A couple of others were given a shake or two that seemed to put some sense into them, for they did not go further to precipitate what would surely have been a clean-up of them. This retribution was meted to them by exasperated citizens who could not but resent the abuse coming from fellows who were better treated than they deserved. Strong arm methods are not generally to be commended but it perhaps was the most effective way to demonstrate the fact that Vulcan district will not tolerate the tactics of men of this particular ilk, and that this be known might minimize the trouble from this quarter in the future.

LOCAL ITEMS

Mrs. Davis, of Emmett, Idaho, at one time a resident of Vulcan, is back to Alberta for a visit with her son and daughter, Mr. Raymond Davis and Miss Davis. The Advocate had the pleasure of a call from Mrs. Davis.

It is a satisfaction to know that the lumber for the new skating rink at Vulcan is to be supplied by a local firm, the Beaver Lumber company. It is the home-town spirit of the place that makes it a satisfaction to the citizens. And further, it can be said, that the Bennett & White Construction company buys where it can do the best business.

Mrs. James Lucas was hostess to the members of Good Deeds Women's Institute, on the occasion of their regular meeting, held on Thursday last, "Education and Better Schools" was the subject of a paper presented by Mrs. A. J. Kennedy, and Mrs. George Thompson contributed to the program a short talk on "Home Economics," both of which were excellent and much appreciated by all of the many members present. Dainty refreshments were served. It was in all a very splendid meeting.

The Elliot Family Orchestra, eight pieces, will play a complete concert program in connection with a complete picture program, at the Vulcan opera house on Monday night. For the two there has been an advance of ten cents on the regular picture prices, being 60c for adults and children 25c. This looks like a treat at a bargain. This is the first appearance of the orchestra in Vulcan, but their advertising is classy and reasonable, and the press comments are good. On Tuesday night they play for a dance in the opera house, and by that time they calculate everybody will know they are good. Price for the dance is \$1.25 a couple.

The gravel for the concrete foundation and piers of the new skating rink is on the site. Vulcan has no gravel, and it had to be shipped in from Calgary. The first work is the putting in of the foundation and piers, and before this is read the same will likely have been commenced. There are great anticipations in connection with the new rink, and now that the start has been made the interest will turn to the subject of when it will be finished. There need be no apprehension about that, for the firm that built the Capitol Theatre at Calgary, surely will build us a real rink at Vulcan. Mr. Bennett, of the Bennett & White Construction Company, the contractors, and Mr. McDonald, architect, were in town a few days ago in connection with the building operations.

Last week mention was made of the improvements being made by the Vulcan Electric Service in connection with their lighting system. The work continues, and the changes include new and bigger poles, heavier wire and other things, as well as a considerable extension of the line in several directions. In conversation with Mr. Wittcock we incidentally learned that, with but two or three exceptions, every building in town, residence and business place, is wired, and where occupied light service is being supplied. Come to think of it, this gives Vulcan another record which is worthy of mention. We do not know that there is a coal oil lamp in town. Besides the progressiveness that is indicated, this is evidence that the light service is securing the patronage that it certainly merits.

G. L. Nelson, an uncle of The Advocate man, came west from Ontario to see the country and pay for his trip by helping in the harvest. He landed here on Labor day, a holiday, but not with the farmers here this year. He had come by the evening train, and before he could even see his nephew, whom he had not seen for thirty-five years, he was picked up and was on his way to the country with "Bob" Dodds, who was hustling help for the farmers. Mr. Nelson was looking for work, but expressed surprise at the speed with which he was landed on the job. He stuck until the harvest was past, and is still at work in the west. Though a successful farmer in the east, everything in the west to him was a surprise and delight. The immense fields of wheat and oats taller than himself was a sight worth the trip, and farming methods on such a large scale were a study of interest to him. His experience was the same as that of many who came to Alberta this year for the first time. Mr. Nelson visited the elevators in Vulcan and watched the smooth running operations there, and it was his privilege to ride up town behind a twelve-horse team, with "Slim" Moorehouse, the man who last year delivered the record load of wheat with a team of thirty horses, and gave Vulcan publicity in every quarter of the globe. He will take back with him a number of pictures and the tales he will have to tell, he fears, will break up his family of boys, who will want to come out to Vulcan.

LOCAL ITEMS

Harvest thanksgiving services will be held in the Anglican church on Sunday, October 14th.

Mrs. E. D. Lockhart and little daughter have gone to Calgary, and will remain for a time, the latter for special medical treatment, and the hope of friends is that the visit will have the desired results.

Rally Day will be observed at the Union church on Sunday morning at eleven o'clock. The boys and girls, together with their parents and friends, are cordially invited. Special program has been provided.

A typographical omission in a recent issue in an item in reference to the pupils of the Vulcan high school made the number of students very small. The number now enrolled and regularly in attendance is thirty-seven and it is expected that there will be an increase.

School Inspector McGregor is this week in Vulcan and district participating in the annual school fair and also giving attention to the usual duties of his position. Since being assigned to this inspectorate, Mr. McGregor has previously been in Vulcan, but the town schools have not previously been visited by the new inspector.

Rev. A. Bradshaw, formerly of the Anglican church at Vulcan, now in the far away Barbadoes, in a letter to friends here writes interestingly of his home and life in that land, and encloses photos of the family, and these indicate health and contentment. Occasionally a copy of the Advocate, sent by friends, finds its way to them, and it is prized by them.

Mr. A. G. Spooner, the clothing man next door to the Advocate office, reports that in one day recently seventeen travelling salesmen approached him for business. This is perhaps an exceptional number for a single day, but every day the town is alive with rustling men of the road, indicating that Vulcan is known to the furthestmost limits of the land as the centre of an area of immense crops. And the travelling salesman does not go empty away. People are buying better than they have bought for many a day, and business is good, and the traveller gets his order.

A. D. Cartwright, secretary of the Board of Railway Commissioners of Canada, has written as follows, to Harry Nelson, secretary of Vulcan Community Club, indicating that the board has made an order of what the Canadian Pacific Railway had already voluntarily determined to do. When the service was curtailed in December the Community Club wired their disapproval, hence the notice from the board of the new order. "I am directed by the board to inform you that on investigation of the service on the Alderside sub-division with the railway company, it has been arranged that the daily except Sunday passenger train service, Alderside sub-division, as in effect prior to December 30th 1922, will be reinstated, effective on the 30th instant."

People from afar, and there are many of them, are seeing things around Vulcan this year. Two of these interested and delighted visitors are Mr. and Mrs. George Kennedy of Seattle, who are guests of Mr. and Mrs. Hunter Heath and other relatives in the vicinity. Mr. Kennedy is a busy city man, but says that no industry can be more interesting than that of harvesting and threshing the immense wheat crops of this country. He has visited many sections of the district and the great fields and bounteous crops everywhere have so pleased, that they are the subject of his almost constant comment. He goes in and out among the farms, visits the elevator centres, and once in a while attends lodge in town, and will go back to the city with the report that he has been having a wonderful time in a wonderful country.

You know that Broadway, in New York, is known the world over as the "Great White Way." Thousands of electric lights make it so. We were teasing in a journal the other day that if it were not for the light contributed by the business places on this street, Broadway would be perhaps a little darker than many another street. The city really does not light Broadway—it is the business man. New York is not a bad place to copy in this respect. And this prompts the suggestion that there could be more light to considerable advantage on the business streets right here in Vulcan. Have you not noticed the necessity already these fall nights, and particularly this fall when business is brisk, and with the extra lights and the crowds that come to town on Saturday nights we could have a little Broadway all our own. There are some electric signs that have gone out, and in front of several places there are lamps but no lights. Let everybody light up and see what a difference it will make, and it will not cost anybody very much.

THE VULCAN ADVOCATE VULCAN, ALBERTA

QUESTION THAT IS PERTINENT

It is well asked why the federal and provincial governments should have a prior claim as depositors over other creditors in the case of a bank that has failed; or, in other words, why should the deposits of governments be safe when no others are? Why should these particular deposits be, so to speak, insured at the expense of those of the ordinary depositor? It is a question of privilege which is not altogether in the interest of the people in general. With the comparative safety the government has when compared with other depositors when a bank crisis occurs, it is only a phase of human nature to cast doubt on the government inspection of banks. Would not the government be inclined not to be over punctilious in the matter of these inspections when it considers that its deposits are to a great measure safe in the discrimination they enjoy? Lost money is just as much of importance to the ordinary individual as to governments. When government deposits are protected at the expense of private deposits it would appear to be a gross assumption of the rights of governments. There cannot but be an uneasy feeling among the public, in the way the security of banks are safeguarded, when the security with which government deposits enjoy over those of the public is brought to mind. It is time that the anomaly be removed, for in its being done there will be a greater assurance among the public that the provisions of the Bank Act are rigorously carried out by the government. It may be urged that the money of governments is public money. But, then, private property needs as much protection as public property. What is 'saucy for the goose cannot but be saucy for the gander, when it comes to bank deposits, and to the retaining of public confidence in our banking institutions.

LIBELLING CANADA

Because in Britain the Grand Trunk affair is still being made the subject of libels on Canada, the Canadian government should go into Britain and settle the matter up, once and for all, instead of spending thousands of dollars on enquiry commissions which get nowhere, says the Vancouver Sun. Either the award was right or it was wrong. The Canadian government should know which and should show which. If it was wrong, if Canada has really "short changed" English investors, she should make prompt amends. If the award was right and Canada, in respect to the Grand Trunk has done the only thing which, as a business proposition, she could do, the minister of finance should take two or three pages of space in the leading British newspapers and outline the full and complete facts. The Britisher is first, last and always a business man and will attach little or no importance to the sentimental side of a straight business deal. Britain has invested millions of pounds sterling in different parts of the Empire and like every other investor has made money and like every other investor has lost money. British business men know this well. It should be easy then, for Canada, by presenting the facts squarely, to head off the present underhand financial gossip, criticism and libel which is being carried on by a certain section of the English press. But the matter must be settled up promptly, fairly and without subterfuge. Canada today has \$500,000,000 worth of trade going to the United States which Britain can have for the asking. But Canada does not want to trade, even with people of her own blood, if she is to be made the subject of libel, every time a bargain breaks wrong for the outside investor.

THE WESTERN VIEW

Why, when the Canadian banking system is supposed to be so creditable to the nation, amalgamation after amalgamation is necessary is hard for the ordinary man in the street to see. The West lost one of its most friendly and useful banks when the Merchants' went to the wall and was taken over by the Bank of Montreal; but it has witnessed with no little relief the manner in which the Union Bank, another essentially Western institution, came through a crisis precipitated by conditions issuing from the war, and the steady progress that has been made by the Weyburn Security Bank, which is still adding to the number of its branches. Sound banking methods combined with a decent regard for the interests of the district a bank serves, will still see a bank in this country through to prosperity.

This fact makes it all the more difficult to understand why there should be further merges or rumors of merges among Canadian banks. The only explanation that will occur to the average citizen in the West is that the money power of the country is being grasped by a few men. And money governs, as well as talks. We are supposed to enjoy in this country a government of the people for the people. We shall have neither a government of the people for the people, or a banking system that will best serve the ultimate end if the present tendency of bank merging has been reached. The government at present in Ottawa cannot better show its friendliness for the people of Canada generally than by displaying an early and unmistakable unfriendliness for further bank mergers.—Exchange.

THE SAVING HABIT

Anything which will encourage the habit of saving in the extravagant age is a blessing. The temptations on every hand are so alluring that it is very difficult for a young man of ordinary self-control to resist them and to save his money. Thousands of young men who are receiving good salaries, some of them very large, never think of laying up a dollar for a rainy day. They never see anything in their salaries but "a good time," and they never develop the habit of saving. You ask them how they are doing and they will say, "Oh just getting along." "Just making a living." "Just holding my own." Just making a bare living is not getting on. The difference between what you earn and what you spend is power. It often measures the distance between success and failure. In many minds the economy faculties are not developed, or are so weak that they are not a match for the passion of spending for pleasure.

PAPER AND PULWOOD

A royal commission has been appointed to enquire into and report upon the pulpwood resources of Canada and public hearings will be held throughout Canada at an early date. The first hearing will be in Halifax on October 2 and subsequent hearings will be held at time and places to be arranged. All this means a big expense to the country, and worse still it means that for the next six months nothing will be done to put a stop to the sale of pulpwood to foreign countries. The people of Canada, we believe, are distinctly opposed to the shipment of pulpwood from Canada to the United States. If paper is required in the United States let them establish their paper mills in Canada and thus give employment to Canadians in the process of manufacture of paper from pulpwood. The government is deserving of criticism in not taking action on this matter long ere this.

HOME BANK FAILURE

Officials of the Home Bank of Canada must have made false returns to the government regarding the bank's financial condition, or the recent failure would not have occurred, is the opinion of many people. To guard against recurrence of loss by depositors in Canadian banks the creation of a federal reserve bank is advocated which would levy a tax on the profits and business of banks in Canada and build up a reserve fund which would be in the nature of insurance to depositors against loss in the event of bank failures.

ALBERTA COAL

The Toronto Telegram displays ignorance of conditions when it says that Alberta mines can not produce 10,000 tons of coal in a month. Why one mine in Lethbridge alone could produce that number of tons of coal in one week. Meanwhile Alberta mines are only operating half of the year and if the Ontario field could be opened for our coal we could produce millions of tons of coal yearly. To the west of High River there remains undeveloped, immense deposits of hard coal which should be opened up. Then Ontario would not be obliged to depend on the United States for their coal supply.

EDITORIAL PARAGRAPHS

The Ottawa Journal remarks: "Wheat is down in price, but we haven't heard anybody say it with flours."

The following warning issued to motorists has our support: "If you meet or overtake a chicken on the road, don't run over it. Give it a ride."

Frank Oliver, Edmonton newspaper man and politician, has been appointed to the board of railway commissioners. That he will fill the position with credit to himself and dominion goes without saying.

The price of liquor in Manitoba is somewhat disappointing as it is considered too high. In Alberta a section of our people will insist on reasonable prices being established before they support Clause "D".

It has been discovered why the Prince of Wales came here as Lord Renfrew. His real name is "Edward Albert Christian George Andrew Patrick David, Prince of Wales", and letting space on his baggage was too small to permit of his full name being inscribed thereon.

The troubles of the Nebraska farmers are presented in a new light by an Omaha paper, which shows that, while they expect to get \$88,000,000 this year from their crops, it will cost them \$135,000,000 to own and run their automobiles, leaving a deficit of \$47,000,000.—Toronto Globe.

The Portland, Ore., Telegram remarks that there are few matters in the world so urgent that they can't wait until the train gets past the crossing. Likewise, there are few investment propositions so good that they must be rushed into without taking time to make sensible enquiries.

Arthur Meighen charged the present federal administration with extravagance, non-fulfilment of pledges, usurpation of office under false pretences, and absolute disregard of the characterized present grain commission as a "screaming farce in its Dominion wide tour," in a two hour address before 700 people in Indian Head, Saskatchewan.

If there were terminal elevator facilities in Alberta, including cleaning machinery, it would mean the expansion of the feeding industry. Sheepmen are demanding screenings and there is little to be had. It seems a pity that screenings must be carried down to Fort William and then back again, paying freight both ways. It would not be profitable to construct cleaning elevators in order to keep the screenings in the province.

The Ford Motor Company expects to occupy their new plant at Toronto by the end of September. The factory when completed will be one of the largest in Toronto, the main building covering an area of 5½ acres, while the entire establishment covers an area of 15½ acres. The plant, which cost in the neighborhood of \$1,500,000, will be used chiefly for assembling purposes.

W. M. DAVIDSON, M.L.A.

Editor of The Morning Albertan

Says

Clause "D" Does Not Mean the Return of the Bar

Writing editorially August 16th, he says:

"The moderationists have always insisted, even when appearing before the Legislative committee drafting the questions, that they did not want the return of the bar and included such a statement in the proposed ballot submitted at the time. The Albertan is quite confident that if "D" passes, this Government and this Legislature will do their utmost to have conditions as different as possible from the old days of the bar. It doubts, AFTER REPEATED STATEMENTS OF THE MODERATIONISTS, if any Government or Legislature would dare to permit what we generally regard as the old bar system.

DO NOT BE FOOLED—The Moderationists are honest in their statements that they do not want the return of the bar.

ITEMS OF INTEREST

According to the irrigation council offices in Lethbridge, great numbers of enquiries from all parts of the world are being received, showing the widespread interest in the cheap lands that are to be obtained on the Lethbridge Northern project and other projects in the south.

Mr. Chamberlain, commissioner of police for the Dominion, accompanied the Royal train on Friday to Banff. He has been in the service for forty years and he accompanied King George across Canada in 1901 when he visited this country as the Prince of Wales. He also accompanied the Prince of Wales in 1919 and he has great admiration for him.

A meeting of turkey growers in the Blackie and surrounding districts will be held at Blackie on Saturday, October 6, in the afternoon, when the matter of shipping a carload or two of turkeys from Blackie to the Vancouver or Montreal markets will be discussed. Mr. O. W. Bowls and others are again showing a keen interest in this co-operative form of marketing turkeys and they intend to work along the same lines as last year, by marketing the turkey crop through the provincial and dominion poultry and egg marketing service. Those who shipped through this medium last year received very satisfactory prices and no doubt they will again try their luck.

New Lamp Burns 94% Air

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. C. Johnston, 579 McDermott Avenue, Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him to introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency and without experience or money make \$200 to \$500 per month.

Cleopatra Washed Her Face This Way

Palm and olive oils—nothing else—give nature's green color to Palmolive Soap.

She used Palm and Olive oils, the same rare oils which are blended in Palmolive. She knew that to have a fresh fine skin, thorough cleansing was necessary. The crude combination of Palm and Olive oils which was the best that even royalty could then obtain is now brought to perfection in Palmolive.

The girl of today, if she would be beautiful, follows Cleopatra's practice. Every day she cleanses the skin thoroughly with mild Palmolive Soap. Never does she permit cold cream, rouge and powder to accumulate and clog the pores of the skin. She knows that this starts irritation and blackheads, pimples and other blemishes result.

Palmolive with its mild creamy lather is lotion-like in its action. It freshens, revives and stimulates and leaves the skin delightfully fresh and rosy.

Thus a great luxury may be enjoyed at the price of ordinary soap. You can pay more, but you can't get a finer, milder cleanser.

You can buy Palmolive Soap at all first-class dealers.

LOOK TO CANADA

With the news of the wonderful crops which is now being garnered in Canada, the eyes of the world are turned in this direction. This fair land of ours is attracting the attention of hundreds of thousands who are desirous of making a new home for themselves says the Hanna Herald. For several years Canada, and particularly Western Canada, has failed to enjoy an influx of immigrants. The prairie farmer has not been so prosperous as we would wish, but the one big crop which is now being threshed is sufficient to turn the tide. Farmers from the United States and the old country settlers will be coming here in swarms next year, the immigration authorities tell us. There are already signs that the Western Provinces are on the verge of more prosperous times. There are already indications of increasing demand for prairie home and western farm land. Other lands particularly California, the Pacific coast states and British Columbia have attracted thousands from Western Canada in recent years, but the tide appears to be changing. Many who left here are coming back or would like to come back. The tendency of farmers to the south of the border to offer their lands in trade for Canadian farms is growing, all of which appears to be a good omen for this country. One good crop has caused all eyes to turn in our direction. When one favorable season will do so much for this fair land, what will a series of favorable years accomplish.

Crops in the Nanton district are averaging very high; stubble land from 22 to 35 bushels and summerfallow from 35 to 50 bushels.

SPLENDID IF TRUE

From reliable official sources received from England it is freely mooted that a forthcoming visit to the E. P. ranch at High River by King George and Queen Mary may be confidently expected in the course of a year or so. It is a well known fact that all members of the Royal family are intensely interested in this business venture on the part of the heir to the British throne—in fact King George is indirectly associated, and much more blooded stock from the royal farm in England is to be sent over and the ranch placed on a firm financial basis. It will be considerably extended in the course of time, in the way of increased acreage of land running to the forest reserve for grazing purpose, while it is also said that farming lands to the east and south will be added for the purpose of carrying on experimental farm work in the production of registered seed grain. Further shipments of blooded stocks from the king's farm, will be used here and loaned to stockbreeders for the improvement of their stocks all of which will be reflected in the production of the right type of animals. The Duke of Westminster, a close friend of the royal family, we learn, is acting in conjunction with the king in shipments of rams and ewes from the most famous old world stock of Hampshire and Shropshire sheep, in which class he has been a prize winner for many years at exhibitions throughout England.

FORD'S BIG PROFITS

Toying with the recently announced figures of the Ford Motor company's income and expenditures for the four months between February 28 and June 30, 1923, Wall Street statisticians discovered that company's net earnings to be \$56,616 hourly, or nearly \$1,000 a minute.

Announcement that the Ford firm had purchased 400,000 acres of standing timber, 5,000,000 to 6,000,000 feet of logs and 20,000,000 feet of lumber in four counties of upper Michigan for many millions of dollars impelled those with a statistical turn of mind to figure out whether Ford was not spending his money faster than he was making it. They found Ford might spend a great deal more money than he is now before spending or investing all his income. Profits are rolling in faster than they can roll out in the form of new enterprises. Although the net profit per car has dropped from \$90 to \$43 in the last year, the output of cars has been so vastly increased that this reduction in per car profit has been more than compensated for by the increased volume of sales. In the four months ending June 30, 1923, the Ford Motor company earned \$54,351,560 net after expenses, etc., and possibly after dividends inasmuch as the figures made public merely show that growth in surplus between the two dates. All of it belongs to Ford and his family. The sum is equivalent to \$13,587,890 monthly nearly \$3,500,000 weekly, and about \$42,930 daily, counting Sundays, but allowing eight hours per day.

TO MAKE MORE SALES

Stock Shippers are deliberately throwing some money away when they neglect to get health-certificates for their cattle shipments and either have them sent along with the cattle or else mark on the billing that the certificates are following by mail, says The Market Examiner. The receipts are increasing now and certificates are necessary both on shipments for the old country or the United States. Even with the high duty against our cattle into the United States there are some loads going across and they cannot be sent unless they have certificates. When the cattle arrive at Calgary yards and are put into the certified pens they have a better chance of attracting the attention of prospective buyers than when they are put in the uncertified pens, which naturally increases competition for them and brings more money to the shipper. Give your commission man a chance to get all the money he can for your cattle—send a certificate.

SHOWS AND SALES

If you have more steers than you can finish this season arrange to have them offered at the stockers and feeder show and sale. They may be good enough to get a piece of the nice prize money that is being offered and if they do not they will have the advantage of being on the market at a time when there will be a lot of buyers looking for that class of stock. If you are going to use up some of that surplus feed which you have on your farm there is no better time to make your selection than at the stocker and feeder show and sale. Hay, green feed and course grains look as though they were going to be cheap. There is a lot of the hauled acreage that will produce a practically unmarketable commodity. Don't you think there will be some money in feeding a few steers with it. The dates are October 9-12 at Calgary, and Winnipeg and Moose Jaw are also having similar shows and sales.—Market Examiner.

At Lomond the crops are going from 25 to 35 bushels per acre.

Health is Wealth

Isn't it true? We all know at least one person who is not enjoying perfect health, and that person is not enjoying life, even though their every day environment and financial condition are all that could be hoped for.

THE MEN'S STORE

RED CROSS NEWS

We are very sorry to report the illness of Mrs. Lars Hanson.

Mr. King preached his farewell sermon last Sunday. Rev. Mr. Brunton will preach next Sunday and probably during the fall and winter.

Redlandview W. I. will hold their first meeting after harvest on Wednesday, October 3rd, at the home of Mrs. Peterson.

Threshing is now in full swing and some good yields are reported.

We are sorry to report the death of little Lillian Thompson, daughter of Mr. and Mrs. Jack Thompson, who died after a lingering illness, while her parents were attending the funeral of Mr. Wm. Hay, Mrs. Thompson's father.

Miss Grace Cascadden, teacher at Brant, spent the week end at Mrs. Snow's, the guest of Miss Mallenberg. Mr. Robbie Love met with a very painful accident on Tuesday. While starting his engine, he slipped and had his foot badly crushed.

REID HILL NEWS

Born to Mr. and Mrs. Fitzpatrick on Friday, 21st Sept., a daughter.

Mrs. Stewart is so far recovered of her recent serious illness as to go to Calgary for an X-ray examination, returning on Friday, 21st inst.

Rally day at Prospect Slope and Reid Hill church on Sunday, 30th Sept. All come out and encourage the children.

We will not boast of our crops in this district, but 40 bushel averages seem to be the usual thing.

Mrs. G. Bowie desires to tender thanks for fruit contributed by the Ladies' Aid of Reid Hill and for the kindness of neighbors and friends during the recent period of illness in the home.

BRANT NEWS

Dad Fletcher is the proud possessor of a new Dodge touring car.

Messrs. George Green, John Eversman and Harry Christiansen were High River visitors Saturday.

The Ladies' Aid held a sale of home cooked food in John's & McKay's store Saturday evening.

Mrs. Neil McColman was ill in the High River hospital a few days last week with a light attack of stomach flu.

The Elliot family orchestra from Brandon, Man., will put on a concert and dance Saturday, Sept. 29, at the Brant hotel.

Lee St. Clair and Delbert Thomas, who are employed at the Malmberg ranch of Herrington, spent the weekend with home folks.

If anybody should find a tire and rim for a Chevrolet car in the Brant district, please return it to Mr. Frank Heckle, as he lost one some time last week.

There were no church or Sunday school services in the Brant union church on Sunday, September 23, on account of the illness of the Rev. Mr. Pawcett.

Miss Grace Cascadden, who is teaching the Emerson school, and Miss Lyla Malmberg, who is teaching at Red Cross, were Saturday evening callers at the home of the Misses Mabel and Louise St. Clair.

Threshing was at a standstill all day Friday and Saturday, caused by a heavy mist Thursday night and a snow storm Friday, which covered the fields with a blanket of snow. However, Monday the fields were dry and the hum of threshing machines could be heard from all directions.

The prospects continue very bright for a splendid crop in Medicine Hat. Harvesting is going on without a hitch and wheat cutting is general. The harvesters have been distributed to a great many points and at present there is no shortage of that class of labor.

ITEMS OF INTEREST

Coleman, Claresholm and Vulcan do a larger express business than any other towns in the province of similar size.

Rev. Ben Spence, the Ontario temperance advocate will speak on prohibition in Alberta for the next few months.

Wheat shipments from Port William on Sept. 20 were 623,000 bushels in three vessels which will take the Buffalo route, as Montreal elevators are full at present.

What is claimed to be a world's record for loading cattle aboard a steamer was established at Quebec, when 282 head of cattle were loaded aboard a steamer in the space of 25 minutes.

Standing on a knoll on Noun Bechtel's farm north east of Blackie, seventeen threshing outfits could be seen in full operation on Tuesday, in the Blackie district. From all sides optimistic reports are coming in of big yields and a fine quality of hard wheat.

John Grant of Black Diamond lost his fine barn recently by fire. It was early morning and Mr. Grant was feeding his pigs when he saw the flames spreading over his barn building. There was no stock lost, but a few chickens and harness, etc., were burned.

A number of duckhunters were caused to appear before Magistrate Barker at Lethbridge for not carrying their licenses with them. The police confiscated their guns and birds, but the guns were later returned on an order from Edmonton. Several of the hunters paid fines of \$10 and costs for this first offence.

More than 6000 motor tourists have visited Banff Park this year. Practically every state in the Union was represented in the 4,800 cars which have been registered. July was the heaviest month with 2,225 cars registered as coming from the east, via Calgary, and 1,627 from the western portal via the Windermere Valley and the new mountain highway.

For the twelve months ending July, Canada exported to other parts of the British Empire goods amounting to \$453,437,899. This is in comparison with \$354,992,074, the figure for the corresponding twelve months previous. Imports from Empire countries in the year ended July were \$195,811,190, as against \$153,185,581 in the previous year.

Alberta this year has reduced her potato acreage by 1500 acres, according to the government figures, and therefore the forecasted yield has been reduced and a lower yield also predicted for all the western provinces with the exception of B. C. It would not be surprising if Alberta had more than the forecast as the crop has been maturing splendidly during the fall.

A building permit for the new two-million bushel grain elevator to be erected adjacent to the new Government dock here by the Board of Harbor Commissioners has been granted by Vancouver. The structure will cost \$1,200,000. The foundation is completed and work is expected to begin in about four weeks, the object being to complete the elevator so that it will be ready to handle part of the 1923 crop.

Ten thousand steers could be fed on the off-grade alfalfa which is available at Magrath and Coalville districts during the finishing season, says the Lethbridge Herald, and the farmers and business interests are now considering how the financing can be arranged. Any arrangements which may be made to keep this low grade alfalfa off the market will not only improve the prices on the remainder, but will get the farmers into the way of finishing steers and on the average year will make them some money and use up the roughage and coarse grains on the farms.

ALBERTA BULLETIN

Issued by Publicity Commissioner of Alberta

The well-known Miami farm, near Lethbridge, which has been noted for its successful crop productions for the past ten years or more, has been sold to a colony of Hutterites for \$250,000. Since assuming the federal government the duty of grading butter for export from Alberta under the new federal regulations, the provincial grading system has graded a total of \$65,598 lbs. for export during the four months mentioned. Special shipments of creamery butter to the British market are now being made weekly in an effort to establish a footing in that market prior to the opening of the New Zealand shipping season.

An extension of the special rate on Alberta coal to Ontario, covering 10,000 tons, has been made by the C.N.R. on condition that the shipments are made before October 31. The orders for this coal are being handled by the Ontario government and it is understood that the bulk of the 10,000 tons is no wonder order. It has been announced that the regular freight rate of \$12.70 ton will go into force again during the grain movement, but it is expected that following the grain movement, the C.N.R. will offer to put into effect a rate of \$9 a ton. Great demand for Alberta coal is being recorded from many Ontario points.

Montana will adopt Alberta's method of fighting the grasshoppers, if state authorities agree to furnish the funds. It was decided at a conference held in Great Falls on August 31, at which Alberta officials were present, and explained this province's method of campaign. Those attending from Alberta were Z. McIlmoyle, assistant deputy minister of agriculture; E. H. Strickland, entomologist at the dominion experimental farm, Lethbridge, and W. H. Fairfield, superintendent of that farm. Montana state officials gave due recognition to the success which attended the Alberta campaign, and also to the fact that neglect of the situation in Montana had caused much of the infestation in Alberta. Definite steps to fight further appearance of the pest in Montana will be taken, as a result of the conference. The object of the visit of the Alberta officials to Montana, was to urge some action, and to bring home the fact that it was from Montana that the bulk of the hoppers had come to Alberta.

In the bulletin of last week reference was made to dates of the various game seasons. In order that there may be no misunderstanding of the dates for the chicken and partridge seasons, it is pointed out that it is only the Hungarian Partridge that may be shot during the whole month of October, and then only in that part of the province south of Battle River. The open season for Prairie Chicken and Ruffed Grouse, (commonly referred to as Partridge) is for the period between the 15th and 31st of October. The bag limit for Hungarian Partridge is 10 per day for both classes of birds, not 10 of each.

In connection with the announcement two weeks ago that the provincial department of municipal affairs would act in taking possession of lands for the purpose of municipal councils to do the same, there is apparently a wrong impression existing that the government had passed an order extending the time for redemption of these lands. This is not the case. The government, in respect of lands over which it has jurisdiction, is merely deferring action toward taking possession of the lands until December 1st, and is recommending to municipal councils that they do likewise. Whether similar action is taken in the various municipalities, is entirely a matter for the municipal councils to decide.

Growth of the dairy industry in Alberta is shown by the figures of increased production covering the four months from May to August of this year. In practically every phase of the industry there has been further development this season. In the butter marketing service conducted by the provincial dairy branch there has been an increase of 30 per cent in the amount handled in the four months, compared with the same period of last year. The amount handled this year has been 697,444 lbs. from eleven creameries compared with 536,195 lbs. from nine creameries in the same four months of 1922. The butter grading service has handled 33 per cent more butter than in the same period last year, this year's figures being 6,631,424 lbs. from 67 creameries, and last year's four months' figures being 4,952,816 lbs. from 49 creameries. In the cream grading service initiated by the government last year there are now 56 graders employed compared with 41 last year, due to the increase in creameries. For the four months this season, a total of 23,258,495 lbs. of cream has been graded, compared with 19,896,360 lbs. last year in the same period. The percentage of special grade cream was 33.7 compared with 28.8 last year, and the percentage of firsts was 43.1 compared with 37.9 last year. The percentage of seconds has been reduced from 30.7 last year to 19.5 this year. There has been a slight reduction in the standard of firsts this year to make the grades of the three western provinces uniform, but this has not materially affected the fact that there has been a steady increase in the percentage of high quality cream.

The headquarters of the Lethbridge Northern Irrigation project board of trustees has been moved from Lethbridge to the town of Commerce, some seven miles from Lethbridge.

It is reported in southern newspapers that the Winnipeg street railway interests have purchased the large and modern coal mining property of the Canada West Coal Company at Taber.

Natural gas was made available to the residents of the town of Viking wells of the Northwestern Utilities was turned into the mains. These are the wells that will shortly supply Edmonton city with gas.

According to the irrigation council offices in Lethbridge, great numbers of enquiries from all parts of the world are being received, showing the widespread interest in the cheap lands that are to be obtained on the Lethbridge Northern project and other projects in the south.

Viscount Morley, veteran statesman of England, died on Sept. 24, aged 85 years.

JUDICIAL SALE

Property in the Town of Vulcan

Pursuant to the Judgment and final order for sale made in a certain action in the District Court of the District of Calgary as No. B-6028, there will be offered for sale with the approval of this Court in front of the Post Office in the Town of Vulcan, on **Saturday, the 29th day of September, 1923**, at 12 o'clock noon, by C. C. Rebbe, Auctioneer, the following property:

Lots 5 and 6 in Block 13 according to a plan of part of Section 5 in Township 17, Range 24, West of the Fourth Meridian, of record in the Land Titles Office for the South Alberta Land Registration District as "Vulcan 4090 A. M."

On the lots there is said to be situated a one storey frame built house size about 12 ft. x 18 ft. with lean-to size about 12 ft. x 18 ft., a frame built shingled roofed wash house and coal house size about 12 ft. x 18 ft., a frame built shingled roofed barn size about 12 ft. x 18 ft. There is also a garage with board roof constructed between the wash house and the barn without side walls.

The property will be offered for sale subject to a Reserve Bid which has been fixed by a Judge in Chambers.

Terms: Ten per cent in cash at time of sale and the balance within 60 days with interest at the rate of 8 per cent per annum.

Further particulars may be had from the Auctioneer or from

HERBERT J. MABER, Vulcan, Solicitor for the Vendor.

LAURENCE J. CLARKE, Clerk of the Court.

MORTGAGE SALE

Notice is hereby given that by virtue of an Order made in a certain action wherein The Great West Life Assurance Company is the Plaintiff, and Wilfred Gane Jensen is the Defendant, the following lands and premises will be sold by Public Auction in front of the Post Office, in the Town of Vulcan, Alberta, on Wednesday, the 10th day of October, A. D. 1923, at the hour of 12 o'clock noon:

The north half of Section thirty-six (36) in township sixteen (16) and range twenty three (23) West of the Fourth Meridian, Alberta, containing three hundred and twenty (320) acres more or less, excepting mines and minerals.

Soil chocolate loam with clay sub-soil. Lands all fenced, three strands wire, cedar posts. Land is ten miles from Vulcan, nearest school one and three-quarter miles, and church and post office one-half mile. Improvements on North West quarter of section are as follows: 80 acres under cultivation, house 12x24, addition 15x24, barn 18x26, granary 12x16, grain bin 12x16, well dug in the pasture. Improvements on the North East quarter of said section: 160 acres under cultivation, of which 100 acres is summer fallow.

Approved: (Sgd.) A. M. MACDONALD, L. J. S. C.

year to 19.5 this year. There has been a slight reduction in the standard of firsts this year to make the grades of the three western provinces uniform, but this has not materially affected the fact that there has been a steady increase in the percentage of high quality cream.

The headquarters of the Lethbridge Northern Irrigation project board of trustees has been moved from Lethbridge to the town of Commerce, some seven miles from Lethbridge.

It is reported in southern newspapers that the Winnipeg street railway interests have purchased the large and modern coal mining property of the Canada West Coal Company at Taber.

Natural gas was made available to the residents of the town of Viking wells of the Northwestern Utilities was turned into the mains. These are the wells that will shortly supply Edmonton city with gas.

According to the irrigation council offices in Lethbridge, great numbers of enquiries from all parts of the world are being received, showing the widespread interest in the cheap lands that are to be obtained on the Lethbridge Northern project and other projects in the south.

Viscount Morley, veteran statesman of England, died on Sept. 24, aged 85 years.
